### 2. Hazards identification ... / >>

| Hazard statements:     |   |  |
|------------------------|---|--|
| H225                   | Highly flammable liquid and vapour.   |  |
| H350                   | May cause cancer.   |  |
| H361                   | Suspected of damaging fertility or the unborn child.  |  |
| H373                   | May cause damage to organs through prolonged or repeated exposure.  |  |
| H319                   | Causes serious eye irritation.  |  |
| H317                   | May cause an allergic skin reaction.  |  |
| H336                   | May cause drowsiness or dizziness.  |  |
| Precautionary statemen | nts:  |  |
| Prevention:            |   |  |
| P210                   | Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.                                      |  |
| P260                   | Do not breathe dust / vapors / aerosols.  |  |
| P202                   | Do not handle until all safety precautions have been read and understood.   |  |
| P242                   | Use non-sparking tools.   |  |
| P201                   | Obtain special instructions before use.   |  |
| P280                   | Wear protective gloves/ protective clothing / eye protection / face protection.   |  |
| P271                   | Use only outdoors or in a well-ventilated area.   |  |
| P264                   | Thoroughly wash the contaminated parts after use with soap and water.   |  |
| P240                   | Ground and bond container and receiving equipment.  |  |
| P243                   | Take action to prevent static discharges.   |  |
| P241                   | Use explosion-proof [electrical / ventilating / lighting / ] equipment.   |  |
| P272                   | Contaminated work clothing should not be allowed out of the workplace.  |  |
| Response:              |   |  |
| P305+P351+P338         | IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do.<br>Continue rinsing. |  |
| P303+P361+P353         | IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower].                            |  |
| P312                   | Call a POISON CENTRE / doctor / if you feel unwell.   |  |
| P304+P340              | IF INHALED: remove person to fresh air and keep comfortable for breathing.  |  |
| P362+P364              | Take off contaminated clothing and wash it before reuse.  |  |
| P370+P378              | In case of fire: use foam, powder or CO2 to extinguish, "do not use water".   |  |
| Storage:               |   |  |
| P403+P235              | Store in a well-ventilated place. Keep cool.  |  |
| P403+P233              | Store in a well-ventilated place. Keep container tightly closed.  |  |
| P405                   | Store locked up.  |  |
| Disposal:              |   |  |
| P501                   | Dispose of the product / container in an ecological platform.   |  |
| 2.2. Other hazards     |   |  |
|                        |   |  |
| Additional hazards     |   |  |
| Repeated exposure r    | may cause skin dryness or cracking.   |  |
| 3. Composition/inf     | formation on ingredients  |  |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

The full wording of hazard (H) phrases is given in section 16 of the sheet.

### 4. First-aid measures

### 4.1. Description of first aid measures

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 30-60 minutes, opening the eyelids fully. Get medical advice/attention.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention.

INGESTION: Have the subject drink as much water as possible. Get medical advice/attention. Do not induce vomiting unless explicitly authorised by a doctor.

INHALATION: Get medical advice/attention immediately. Remove victim to fresh air, away from the accident scene. If the subject stops breathing, administer artificial respiration. Take suitable precautions for rescue workers.

#### 4.2. Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown.

### 4.3. Indication of any immediate medical attention and special treatment needed

Information not available

9905R282-01-G - URACRIL - FONDO ACRILICO ACRYLIC SEALER TRASPARENTE

### 5. Fire-fighting measures

### 5.1. Extinguishing media

SUITABLE EXTINGUISHING EQUIPMENT

Extinguishing substances are: carbon dioxide, foam, chemical powder. For product loss or leakage that has not caught fire, water spray can be used to disperse flammable vapours and protect those trying to stem the leak.

UNSUITABLE EXTINGUISHING EQUIPMENT

Do not use jets of water. Water is not effective for putting out fires but can be used to cool containers exposed to flames to prevent explosions.

### 5.2. Special hazards arising from the substance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE Excess pressure may form in containers exposed to fire at a risk of explosion. Do not breathe combustion products.

### METHYL METHACRYLATE

Heat may cause the product to polymerise, which could lead to explosion.

### 5.3. Advice for firefighters

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations. SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

### 6. Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

### 6.2. Environmental precautions

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

### 6.3. Methods and material for containment and cleaning up

Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material.

Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

### 6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

### 7. Handling and storage

### 7.1. Precautions for safe handling

Keep away from heat, sparks and naked flames; do not smoke or use matches or lighters. Without adequate ventilation, vapours may accumulate at ground level and, if ignited, catch fire even at a distance, with the danger of backfire. Avoid bunching of electrostatic charges. When performing transfer operations involving large containers, connect to an earthing system and wear antistatic footwear. Vigorous stirring and flow through the tubes and equipment may cause the formation and accumulation of electrostatic charges. In order to avoid the risk of fires and explosions, never use compressed air when handling. Open containers with caution as they may be pressurised. Do not eat, drink or smoke during use. Avoid leakage of the product into the environment.

### 7.2. Conditions for safe storage, including any incompatibilities

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Store in a cool and well

### 8. Exposure controls/personal protection ... / >>

### 8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. Personal protective equipment must comply with current regulations. HAND PROTECTION

Protect hands with category III work gloves (OSHA 29 CFR 1910.138).

The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

SKIN PROTECTION

Wear category I professional long-sleeved overalls and safety footwear. Wash body with soap and water after removing protective clothing. EYE PROTECTION

Wear airtight protective goggles (OSHA 29 CFR 1910.133, CSA Standard CAN/CSA-Z94.3-92).

RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, wear a mask with a NIOSH certified filter, whose class must be chosen according to the limit of use concentration (NIOSH 42 CFR 84, OSHA 29 CFR 1910.134, CSA Standard Z94.4-02). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus or external air-intake breathing apparatus. For a correct choice of respiratory protection device, see standard NIOSH 42 CFR 84, OSHA 29 CFR 1910.134, CSA Standard Z94.4-02. ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

### 9. Physical and chemical properties

#### 9.1. Information on basic physical and chemical properties

| Properties                             | Value                    | Information |
|--|--------------------------|-------------|
| Appearance                             | liquid                   |             |
| Colour                                 | colourless               |             |

### 10. Stability and reactivity

### 10.1. Reactivity

There are no particular risks of reaction with other substances in normal conditions of use.

2-METHOXY-1-METHYLETHYL ACETATE

Stable in normal conditions of use and storage. With the air it may slowly develop peroxides that explode with an increase in temperature.

9905R282-01-G - URACRIL - FONDO ACRILICO ACRYLIC SEALER TRASPARENTE

### 10. Stability and reactivity ... / >>

### TOLUENE

Avoid exposure to: light.

METHYL ETHYL KETONE

Reacts with: light metals, strong oxidants. Attacks various types of plastic materials. Decomposes under the effect of heat.

N-BUTYL ACETATE

Decomposes on contact with: water.

ISOBUTYL ACETATE

Decomposes under the effect of heat.Attacks various types of plastic materials.

### ISOBUTYL METHYL KETONE

Reacts violently with: light metals.Attacks various types of plastic materials.

### 10.2. Chemical stability

The product is stable in normal conditions of use and storage.

### 10.3. Possibility of hazardous reactions

The vapours may also form explosive mixtures with the air.

### METHYL METHACRYLATE

May polymerise on contact with: ammonia,organic peroxides,persulphates.Risk of explosion on contact with: dibenzoyl peroxide,diterbutyl peroxide,propionaldehyde.May react dangerously with: strong oxidising agents.Forms explosive mixtures with: air.

### 2-METHOXY-1-METHYLETHYL ACETATE

May react violently with: oxidising substances, strong acids, alkaline metals.

### TOLUENE

Risk of explosion on contact with: fuming sulphuric acid,nitric acid,silver perchlorate,nitrogen dioxide,non-metal halogenates,acetic acid,organic nitrocompounds.May form explosive mixtures with: air.May react dangerously with: strong oxidising agents,strong acids,sulphur.

### ETHANOL

Risk of explosion on contact with: alkaline metals,alkaline oxides,calcium hypochlorite,sulphur monofluoride,acetic anhydride,acids,concentrated hydrogen peroxide,perchlorates,perchloric acid,perchloronitrile,mercury nitrate,nitric acid,silver,silver nitrate,ammonia,silver oxide,ammonia,strong oxidising agents,nitrogen dioxide.May react dangerously with: bromoacetylene,chlorine acetylene,bromine trifluoride,chromium trioxide,chromyl chloride,fluorine,potassium tert-butoxide,lithium hydride,phosphorus trioxide,black platinum,zirconium (IV) chloride,zirconium (IV) iodide.Forms explosive mixtures with: air.

### METHYL ETHYL KETONE

May form peroxides with: air,light,strong oxidising agents.Risk of explosion on contact with: hydrogen peroxide,nitric acid,sulphuric acid.May react dangerously with: oxidising agents,trichloromethane,alkalis.Forms explosive mixtures with: air.

### N-BUTYL ACETATE

Risk of explosion on contact with: strong oxidising agents.May react dangerously with: alkaline hydroxides,potassium tert-butoxide.Forms explosive mixtures with: air.

### ISOBUTYL ACETATE

Risk of explosion on contact with: strong oxidising agents.May react violently with: alkaline hydroxides,potassium tert-butoxide.Forms explosive mixtures with: air.

### ISOBUTYL METHYL KETONE

May react violently with: oxidising agents.Forms peroxides with: air.Forms explosive mixtures with: hot air.

### 10.4. Conditions to avoid

Avoid overheating. Avoid bunching of electrostatic charges. Avoid all sources of ignition.

### METHYL METHACRYLATE

Avoid exposure to: heat,UV rays.Avoid contact with: oxidising substances,reducing substances,acids,bases.

### ETHANOL

Avoid exposure to: sources of heat, naked flames.

METHYL ETHYL KETONE

Avoid exposure to: sources of heat.

### N-BUTYL ACETATE

Avoid exposure to: moisture, sources of heat, naked flames.

ISOBUTYL ACETATE

Avoid exposure to: sources of heat, naked flames.

### ISOBUTYL METHYL KETONE

Avoid exposure to: sources of heat.

### 10.5. Incompatible materials

2-METHOXY-1-METHYLETHYL ACETATE

Incompatible with: oxidising substances, strong acids, alkaline metals.

METHYL ETHYL KETONE

Incompatible with: strong oxidants, inorganic acids, ammonia, copper, chloroform.

N-BUTYL ACETATE

Incompatible with: water, nitrates, strong oxidants, acids, alkalis, zinc.

ISOBUTYL ACETATE

### 9905R282-01-G - URACRIL - FONDO ACRILICO ACRYLIC SEALER TRASPARENTE

### 10. Stability and reactivity ... / >>

Incompatible with: strong oxidants,nitrates,strong acids,strong bases. ISOBUTYL METHYL KETONE Incompatible with: oxidising substances,reducing substances.

### 10.6. Hazardous decomposition products

In the event of thermal decomposition or fire, gases and vapours that are potentially dangerous to health may be released.

#### METHYL METHACRYLATE

When heated to decomposition releases: harsh fumes, zinc alloys.

### 11. Toxicological information

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification.

It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

### 11.1. Information on toxicological effects

Metabolism, toxicokinetics, mechanism of action and other information

2-METHOXY-1-METHYLETHYL ACETATE

The main route of entry is the skin, whereas the respiratory route is less important due to the low vapour pressure of the product.

#### Information on likely routes of exposure

2-METHOXY-1-METHYLETHYL ACETATE WORKERS: inhalation; contact with the skin.

TOLUENE

WORKERS: inhalation; contact with the skin.

POPULATION: ingestion of contaminated food or water; inhalation of ambient air; contact with the skin of products containing the substance.

N-BUTYL ACETATE WORKERS: inhalation; contact with the skin.

Delayed and immediate effects as well as chronic effects from short and long-term exposure

### 2-METHOXY-1-METHYLETHYL ACETATE

Above 100 ppm causes irritation of the eye, nose and oropharynx mucous membranes. At 1000 ppm, disturbance of equilibrium and severe eye irritation can be noticed. Clinical and biological examinations carried out on exposed volunteers revealed no anomalies. Acetate produces greater skin and eye irritation with direct contact. No chronic effects on humans have been reported (INCR, 2010).

#### TOLUENE

Toxic effect on the central and peripheral nervous system with encephalopathy and polyneuritis; irritating for the skin, conjunctiva, cornea and respiratory apparatus.

### N-BUTYL ACETATE

In humans, the substance's vapours cause irritation of the eyes and nose. In the event of repeated exposure, skin irritation, dermatitis (dryness and cracking of the skin) and keratitis appear.

### Interactive effects

#### TOLUENE

Certain drugs and other industrial products can interfere with the metabolism of the toluene.

#### N-BUTYL ACETATE

A case of acute intoxication been reported involving a 33 year old worker while cleaning a tank with a preparation containing xylenes, butyl acetate and ethylene glycol acetate. The person had irritation of the conjunctiva and upper respiratory tract, drowsiness and motor coordination disorders, which disappeared within 5 hours. The symptoms are attributed to poisoning by mixed xylenes and butyl acetate, with a possible synergistic effect responsible for the neurological effects. Cases of vacuolar keratitis are reported in workers exposed to a mixture of butyl acetate and isobutanol vapours, but with uncertainty concerning the responsibility of a particular solvent (INRC, 2011).

### 12.5. Results of PBT and vPvB assessment

On the basis of available data, the product does not contain any PBT or vPvB in percentage  $\geq$  than 0,1%.

### 12.6. Other adverse effects

Information not available

### 13. Disposal considerations

### 13.1. Waste treatment methods

Reuse, when possible. Neat product residues should be considered special non-hazardous waste. Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations. CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

### 14. Transport information

### 14.1. UN number

ADR / RID, IMDG, IATA: 1263

### 14.2. UN proper shipping name

| ADR / RID: | PAINT or PAINT RELATED MATERIAL |
|------------|---------------------------------|
| IMDG:      | PAINT or PAINT RELATED MATERIAL |
| IATA:      | PAINT or PAINT RELATED MATERIAL |

### 14.3. Transport hazard class(es)

| ADR / RID: | Class: 3 | Label: 3 |
|------------|----------|----------|
| IMDG:      | Class: 3 | Label: 3 |
| IATA:      | Class: 3 | Label: 3 |

### 14.4. Packing group

ADR / RID, IMDG, IATA: II

9905R282-01-G - URACRIL - FONDO ACRILICO ACRYLIC SEALER TRASPARENTE

Revision nr.6 Dated 5/3/2022 Printed on 5/3/2022 Page n. 14 / 15 Replaced revision:5 (Dated 3/17/2022)

### 14.6. Special precautions for user

ADR / RID:

IMDG:

IATA:

HIN - Kemler: 33 Special provision: 640C EMS: F-E, <u>S-E</u> Cargo: Pass.: Special provision:

Limited Quantities: 5 L Maximum quantity: 60 L Maximum quantity: 5 L A3, A72, A192

Limited Quantities: 5 L

Tunnel restriction code: (D/E)

Packaging instructions: 364 Packaging instructions: 353

### 14.7. Transport in bulk according to Annex II of Marpol and the IBC Code

Information not relevant

### 15. Regulatory information

### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Substances subject to the Rotterdam Convention: None

Canadian Regulatory Information

This product has been classified in accordance with the hazard criteria of the Hazardous Products Regulations (HPR).

Safety Data Sheet according to WHMIS 2015.

Inventory Status of the contained substance/s.

All ingredients are listed in DSL.

Architectural Coatings Regulations SOR/2009-264 Any other varnish.

VOC given in g/litre of product in a ready-to-use condition : The coating is to be applied without dilution or thinning. 647.75

### 16. Other information

Text of hazard (H) indications mentioned in section 2-3 of the sheet:

| H225 | Highly flammable liquid and vapour.                                |
|------|--|
| H226 | Flammable liquid and vapour.                                       |
| H350 | May cause cancer.  |
| H361 | Suspected of damaging fertility or the unborn child.               |
| H332 | Harmful if inhaled.  |
| H304 | May be fatal if swallowed and enters airways.                      |
| H373 | May cause damage to organs through prolonged or repeated exposure. |
| H318 | Causes serious eye damage.   |
| H319 | Causes serious eye irritation.                                     |
| H315 | Causes skin irritation.  |
| H335 | May cause respiratory irritation.                                  |
| H317 | May cause an allergic skin reaction.                               |
| H336 | May cause drowsiness or dizziness.                                 |

- Note for users:

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product.

This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses. Provide appointed staff with adequate training on how to use chemical products.

CALCULATION METHODS FOR CLASSIFICATION

Product classification derives from criteria established by the Canada's Hazardous Products Regulations (HPR) (WHMIS 2015), unless determined otherwise in Section 11 and 12. The data for evaluation of chemical-physical properties are reported in section 9.
